EXPERIENCE

Senior Software Engineer (Full Stack + Gen AI focused)

Naukri.com (Info Edge India Ltd.)

Oct 2024 - Present New Delhi, India

- Worked as a **Full-Stack AI Engineer** across multiple product pods, spanning **frontend development, backend engineering, and Agentic AI workflows**.
- Engineered a **bot-defense and rate-limiting platform**, reducing security infrastructure costs by **50%**.
- Built **AmbitionBox MCP** and **LangChain-based RAG agents**, improving contextual accuracy by **50%** and user engagement by **25%**.
- Architected a **vector embedding and clustering-based deduplication pipeline**, reducing identified duplicate pages by **100%**.
- Led **Kubernetes and machine migrations** and implemented **Akamai security policies**, improving security and production reliability.
- Built a **real-time direct messaging platform** and **Agentic AI moderation pipelines** for AmbitionBox Communities, increasing interactions by **25%** and content engagement by **100%**.
- Implemented **site-wide CAPTCHA validation** to mitigate malicious traffic and automated scraping, reducing data abuse and improving **platform security and performance**.

Software Engineer

Helium (gethelium.co)

June 2024 - Oct 2024 New Delhi, India

- Built **Helium Glide**, an AI-powered no-code visual editor for e-commerce applications, engineering a **high-performance rendering engine using low-level React APIs** and integrating Helium Flare for AI-driven personalization.
- Migrated the platform from **CSR to ISR**, improving page performance, scalability, and rendering efficiency for no-code generated applications.

Software Engineer Intern

Swiggy Instamart

October 2023 - June 2024 Remote

- Enhanced **IM Retails App reliability** by implementing critical **New Relic alerts, production monitoring, and code-quality measures**.
- Migrated critical **Picker workflows from Next.js to React Native** and revamped the IM Retails UI, improving the app's **performance and user experience**.

Open Source Contributor

Google Summer of Code | ScoReLab LINK

June 2022 - Sept 2022 Remote

- Revamped the **UI and architecture of Codelabz**, modernizing its dependency stack and development environment to significantly **reduce development load time**.
- Built **high-performance backend APIs** on a serverless architecture using **Firebase Cloud Functions**, enabling scalable application connectivity.

EDUCATION

B.Tech. (ECE) - 8.99 CGPA

Jamia Millia Islamia

July 2020 - July 2024

Higher Secondary - 92.6%

Central Board of Secondary Education

2020

Secondary - 84.8%

Central Board of Secondary Education

2018

PROJECTS

HARDWARE FORENSIC SUITE LINK

- Built a **hardware forensic suite** for disk, memory, and network analysis, winning the **Kavach 2023 Cyber Security Hackathon** by AICTE, BPRD, and I4C.

WayFinder LINK

- Built **WayFinder**, a **LangChain-based Agentic AI travel planner** orchestrating research across **Cleartrip, RedBus, Booking.com, Swiggy, Reddit, and Web Search**, generating **personalized, budget-optimized itineraries**.

BLAH.JS LINK

- Built a **TypeScript UI rendering library** with a custom **compiler, parser, and VS Code extension**, supporting dynamic rendering and efficient DOM updates through ID-based element tracking.

Research Paper - Rolling The Dice LINK

- Analyzed **strategic decision-making in LLMs** using Monopoly as a controlled environment to evaluate reasoning, planning, and long-term decision-making capabilities.

ACHIEVEMENTS

- Volunteered at AGAMI, consulted developers build ODR (Online Dispute Resolution) protocol LINK

TECHNICAL SKILLS

Languages: Java • Javascript/Typescript • C++ • SQL
Python • Go

Technologies/Frameworks/Libraries: React.JS • Node.JS • React Native • Android
Testing • gRPC • Spring Boot • Kafka • Elastic Search • Aerospike
